

**What the invention claimed is:**

1. An electronic device comprising a plurality of air outlets in an outer shell thereof and an ozone ( $O_3$ )/anion ( $H_3O_2^-$ ) generating circuit adapted to generate ozone and anion and output generated  
5 ozone and anion through said air outlet after connection of the electronic device to power supply.

2. The electronic device as claimed in claim 1, which is an AC adapter.

3. The electronic device as claimed in claim 1, which is a  
10 mobile telephone hand-free handset.

4. The electronic device as claimed in claim 1, which is a mobile telephone battery charger for use in a motor vehicle.
